This document contains information on products which is targeted to a wide range of audiences and could contain product details or information otherwise not accessible or valid in your country.

Max Innovation

- ⊙ **Standardised “Max Generation” Graphical User Interface** with a touch screen operated Windows 10 software, including a virtual keyboard
- ⊙ **Built-in accreditation process**
 - Multiple login and access levels available
 - Extended traceability that meets quality requirements:
 - Complete management of reagent information (ISI, lot number, expiration date, volume, on board stability)
 - Archiving of entire patient results (up to 6 months) & easy data transfer with USB export
- ⊙ **New hardware design** enhancing ergonomics & ease of use
- ⊙ **Multiple new software features** to enhance productivity
 - User definable reflex testing
 - Extended QC management
 - User-management QC frequency (time, number of samples)
 - Westgard rules per QC level and per methodology
 - Multiple calibration curves per assays

Max Efficiency

- ⊙ **Viscosity-Based (Mechanical) Detection System** consistently delivers accurate results
 - Exclusive technology standardised on all Stago systems
 - Insensitive to interferences from haemolysis, icteric and lipaemic samples for clotting assays
 - Maximum precision for weak clot detection
- ⊙ **Stago double resolution pipetting system** ensuring excellent precision and sampling reliability

- ⊙ **High quality of reagents** offering maximum sensitivity and reproducibility for all tests
- ⊙ **Routine and specialised tests** performed with continuous/random access capability

Max Reliability

- ⊙ **Enhanced reliability** to increase instrument uptime
 - Robust hardware for continuous result reporting
 - Minimal user maintenance thanks to maintenance free needle & fluidic system
 - On board maintenance log for quality compliance
- ⊙ **Positive identification** of samples and reagents
- ⊙ **Comprehensive system (Instrument + reagents) designed for low-volume labs**
 - Result standardisation across Stago systems
 - Exclusive pre-calibration feature for all routine tests
 - Extended on board stabilities
- ⊙ **Environmentally friendly design providing economic savings:**
 - Limited and contained fluidic waste system
 - Reduction of disposable waste (1 cuvette = 1 test)

Max Flexibility

- ⊙ **Large on board loading capacity** providing true walkaway capability for low-volume and satellite labs
 - 20 samples on board
 - 16 cooled reagent positions (4 stirred)
 - 220 unitary cuvettes on board
- ⊙ **True continuous loading with carousel system**
 - Offers unitary capacity for loading additional reagents and samples
 - Offers true positive identification with integrated barcode reader
 - Compatible with most tube sizes
- ⊙ **STAT management** prioritises patient samples to ensure a faster turnaround time (TAT)
